Objective

Highly motivated software engineer experienced in back-end development and object-oriented design. Coming with well-honed skills in computer science in addition to excellent communication skills in a fast-paced environment.

Experience

General Motors | Software Engineer Mar 2022 - Present

Collaborate with a multi-functional team to build industry-leading mobile apps for connected vehicles. My role covers the entire development lifecycle: feature development, programming, testing, and debugging. Followed by Agile practices like Scrum and SAFe to ensure continuous improvement. My expertise in TypeScript, React Native and Redux drives the delivery of high-quality, innovative solutions.

HCL | Software Developer Jun 2021 – Mar 2022

Using Java and Python, develop and deploy software codes as part of end-to-end enterprise software development project and ensure the developed code is in accordance with time and quality.

Skills

Python, TypeScript, React Native, Redux, SQL, HTML/CSS

Education

UNIVERSITY OF WASHINGTON

B.S. in Computer Science and Software Engineering

Dec 2020 GPA: 3.62
